LEMON-QUAT One Step Disinfectant Germicidal Detergent and Deodorant (#0235)

Overview

LEMON-QUAT One Step Disinfectant Germicidal Detergent and Deodorant is a concentrated 4 ounce per gallon neutral hospital disinfectant that utilizes a highly efficacious quaternary blend of a Dialkyl quat with the first generation ADBAC quat, commonly referred to as the 5th Generation quat. This synergistic quat blend used in LEMON-QUAT One Step Disinfectant Germicidal Detergent and Deodorant exhibits high soil and hard water tolerance with mixed micelle soil removal performance that translates into a real world performance where conditions that breed microbial pathogens are seldom controlled.

Now with Swine Influenza A (H1N1) virus and Influenza A (H1N1) virus

Virucidal against (at 4 ounces per gallon)

This product was evaluated in the presence of 5% serum and 400 ppm hard water with a 10 minute contact time and found to be effective against the following viruses on hard nonporous environmental surfaces.

(Testing is performed per EPA Guidance (DIS/TSS-7). Two separate lots are tested. Inactivation of virus must be demonstrated at all dilutions when no cytotoxicity is observed or at all dilutions above the cytotoxic level when it is observed. The data must demonstrate a 3-log reduction in viral titer for both lots.) (3 lots and 4-Log reduction for Canada).
