

Bathroom Plus Non-Acid Disinfectant Bathroom Cleaner #1720

EPA Registration No.: 10324-85-2296

Summary of Antimicrobial Test Results

Bathroom Plus is a one-step Ready-To-Use (RTU) hospital disinfectant cleaner that is effective against a broad spectrum of bacteria, viruses or fungi and will inhibit the growth of mold and mildew and their odors.

Hospital Disinfection

This product is bactericidal according to the AOAC Use Dilution Test method on hard inanimate surfaces modified in the presence of 5% organic serum (850 ppm active). Treated surfaces must remain wet for 10 minutes. (Testing is performed per the AOAC UDT/GST method (DIS/TSS-1). Sixty carriers are required on 3 separate lots, one of which must be >60 days old against Pseudomonas aeruginosa, Salmonella choleraesuis and Staphylococcus aureus. Killing of 59 out 60 carriers is required (total carriers = 540).)

Supplemental Organisms

(Testing is performed per the AOAC UDT/GST method. Ten carriers are required on 2 separate lots against each supplemental organism. Killing of 10 out 10 carriers is required (total carriers = 20).)

Virucidal against

This product was evaluated in the presence of 5% serum with a 10 minute contact time and found to be effective against the following viruses on hard nonporous environmental surfaces.

(Testing is performed per EPA Guidance (DIS/TSS-7). Two separate lots are tested. Inactivation of virus must be demonstrated at all dilutions when no cytotoxicity is observed or at all dilutions above the cytotoxic level when it is observed. The data must demonstrate a 3-log reduction in viral titer for both lots (3 lots for Canada).)

Mold and Mildew Control

Use this product to control the growth of mold and mildew and their odors on hard, non-porous surfaces. Thoroughly wet all treated surfaces completely. Let air-dry. Repeat application weekly or when growth or odor appears.

Fungicidal against

This product was evaluated in the presence of 5% serum with a 10 minute contact time and found to be effective against the following fungi on hard nonporous environmental surfaces.

(Testing is performed per the AOAC fungicidal method (DIS/TSS-6). Two separate lots are tested against Trichophyton Metagrophytes in a suspension test. Killing of all fungal spores in 10 minutes is required.)
