Gilson specifications set with Gilson PIPETMAN DIAMOND Tips.

The maximum permissible errors always apply to the entire pipetting system that includes piston pipette and tip. When using pipette tips other than Gilson PIPETMAN DIAMOND Tips with PIPETMAN pipettes, Gilson specifications do not apply.

Under these conditions:

- Gilson volumetric specifications in standard pipetting (PIPET mode) are guaranteed with a performance exceeding ISO 8655-2 recommendations for this mode.
- In the absence of ISO recommendations for repetitive pipetting mode for air-displacement pipettes, Gilson volumetric specifications for repetitive pipetting (REPETITIVE mode) are guaranteed within ISO 8655-2 recommendations for standard pipetting (Cf. ISO 8655-2 table 1).
