SDS-PAGE & Western Blot Detection

(A) SDS-PAGE and stain demonstrating 1 μg and 5 μg (lanes 1, 2 respectively) of EBOV rGPdTM His-tag protein under denaturing and reducing conditions. MW denotes Novex Sharp prestained protein marker. (B) Western blot detection of EBOV rGPdTM at 500 ng, 100 ng and 50 ng (lanes 1-3) using rabbit anti-EBOV GP polyclonal antibody (catalog# 0301-015) at 0.5 $\mu g/mL$ and antirabbit IgG-HRP conjugate, followed by TMB membrane substrate.

ELISA Data

| EBOV rGPdTM ng/well | OD 650 nm |
|------------------------|-----------|
| 800 | 3.734 |
| 400 | 3.785 |
| 200 | 3.760 |
| 100 | 3.775 |
| 50 | 3.693 |
| 25 | 3.648 |
| 12.5 | 3.498 |
| 6.25 | 3.213 |
| 3.125 | 2.595 |
| 1.563 | 1.887 |
| 0.781 | 1.082 |
| 0.391 | 0.652 |

Plate was coated with EBOV rGPdTM starting at 800 ng/well, serially diluted in DPBS. Washed plate was detected using using one dilution of a positive control serum, followed with anti-IgG HRP conjugate and TMB substrate. OD650 is reported. OD650 is reported. Background of EBOV rGPdTM coated plate positive control serum was $0.111\ OD_{650}$.

Recombinant Ebola virus Glycoprotein minus the Transmembrane Region (EBOV rGPdTM)

Catalog #: 0501-016

Lot #: 1604008

Description: Mature, recombinant, His-tagged Ebola virus Glycoprotein minus the transmembrane domain (EBOV rGPdTM) is supplied as purified protein. EBOV rGPdTM is produced in Sf9 insect cells using baculovirus for expression and is purified by FPLC.

Storage: 2-3 weeks at -20°C, -80°C long term

Size: 500 μg of protein supplied in PBS (supplemented with glycerol, arginine and glutamic acid) at a concentration of 1.250 mg/mL. The theoretical molecular weight of the protein is ~ 68 kDa including the His-tag, without glycosylation. Because of the highly glycosylated nature of this protein, migration in an SDS-PAGE gel is slowed resulting in broad, diffuse bands representing differing glycosylation forms.

Relevance: Recombinant glycoprotein provides a means as a control protein for immunoassays and a tool to enhance research.

Western Blot: Quality control testing demonstrates strong detection of GP null and GP1 under reduced conditions.

Related Products: IBT provides a wide array of antifilovirus specific antibodies and other infectious disease reagents. Please see our website, <u>www.ibtbioservices.com</u> for more details.

Intended for research use only, not for human, therapeutic, or diagnostic applications.
