

Technical Datasheet

Hoods are made of 16 grams/m² by weight, spunbonded polypropylene material, commonly used in a clean environment.

SPP hoods are available in white color. Hoods are manufactured, vacuum-sealed in a stringent clean environment.

CAS#:	Not Established
LAT/IACO Hazard Rating:	Not Restricted
D.O.T. Rating:	Not Restricted

Technical Details:

Physical and Chemical Properties	Normal Precautions	Fire and Explosion	Other Precautions
16g/m ² White Polypropylene	Ventilation - Not necessary under normal conditions	Stability - Stable	Storage:
Color: White	Equipment - Not necessary	Flash Point - N/A	No special precautions necessary
Odor: N/A	Spills Clean up - Not necessary	Extinguishing Media - Foam, Carbon Dioxide, Water	Keep at normal room temperature
		Conditions to avoid - None	
		Incompatible - None	

Physical Properties:	
Material:	Spunbounded Polypropylene
Size:	L, XL
Material Thickness:	2.0 mils + 0.2 mils
Color:	White
Tensile Strength:	MD = 2.8 kg/5cm; CD = 1.9 kg/5cm
Ultimate Elongation:	30 -100%
PACKING:	40pcs/vacuum sealed bag, 200pcs/case

Ordering Information:

Thomas No.	Color	Description
XC2135-LG	White	Hoods PP 16g, size LG, 40pcs/bag, 200pcs/ctn, case only
XC2135-XL	White	Hoods PP 16g, size XL, 40pcs/bag, 200pcs/ctn, case only
