**Subject:** Supply Chain Status Update: Middle East Conflict

Dear Valued Customer,

We are closely monitoring the evolving situation related to the current conflict in the Middle East and any potential impacts to global transportation and raw material supply.

At this time, we have completed an initial review with our key suppliers and have not identified any known disruptions or anticipated supply constraints affecting the materials used in products supplied to you. Our suppliers have confirmed that their operations, upstream supply chains, and logistics channels are currently functioning normally.

We will continue to actively monitor developments, particularly related to transportation routes and raw material inputs that could be affected if the situation escalates. We will promptly communicate any risks or changes that emerge that could impact supply availability or economics (price).

Please let us know if you have any additional questions or concerns.

Best regards,

Mindy Rowley
