

PH-ABT-NSF-UCFS-0104G

Product Description

These countertop pharmacy refrigerators are certified in accordance with the NSF/ANSI 456 Standard for Vaccine Storage With this certification, units protect pharmaceuticals at optimal temperatures, preventing waste and allowing for peak

These glass door refrigerators utilize microprocessor controllers and feature temperature alarms, remote alarm contacts, and probe access ports with included probes. Units run on natural, hydrocarbon refrigerant for environmental health and energy efficiency.

General Description and Application

Description Single Glass Door Pharmacy/Vaccine Undercounter Refrigerator Freestanding Left Hinged Operational environment Indoor use only. Optimal operating range: +18°C to +26°C (+65°F to +78°F), <70% RH

Storage capacity 1 cu. ft. gross volume

One swing glass door, self-closing, left hinged, non-reversible, magnetic sealed gasket, keyed lock

Three shelves (two adjustable/one fixed) with guard rail on back Shelves

Mounting and Installation Leveling legs. Note: 4" of clearance on all sides must be maintained for adequate ventilation

Interior lighting Shielded, switched LED lighting, full coverage, balanced spectrum

Forced Air technology, patent pending

Rear wall port (23/32") dia. External probe access

Cabinet is foamed-in-place with EPA compliant high density urethane foam nsulation

Exterior materials White powder coated steel

Pyxis®, Omnicell® and AcuDose RX® compatible Access control

General warranty Two (2) years parts and labor warranty, excluding display probe calibration

Compressor warranty Five (5) years compressor warranty

Product Weight 66 lbs. Shipping Weight 94 lbs. 0.9 A max

Power Plug/Power Cord NEMA 5-15 plug, 8 to 10 ft typical, conforms to UL471 requirements, Vaccine storage power cord

Facility Electrical Requirement 110-120V AC: 15 A (minimum)

Agency Listing and Certification Certified in accordance with the NSF/ANSI 456 Standard for Vaccine Storage. UL, C-UL, ETL, C-ETL

listed (either single or dual agency listings) and certified to UL471 standard, hydrocarbon

Temperature monitor device (TMD) complies with the current CDC guidelines, with 3 years Included Accessories

certification of calibration, "buffered" probe in the product simulated solution, min/max memory F/C switchable, field installable, and visual & audible temp alarm

Pharmacy refrigerator/freezer toolkit and temperature logs

Refrigeration System

Hermetic, high performance Refrigerant EPA SNAP compliant, R600a, Isobutane Tube and grid construction, fanless Condenser

Evaporator Plate wall

Defrost Cycle optimized, zero energy

Performance

Uniformity¹ (Cabinet air) +/- 1.5°C Stability² (Cabinet air) Maximum temperature variation +/- 1.8°C

Temperature rise after 8 sec door openings Temperature did not exceed 6.8°C at any probe for all required NSF/ANSI 456 testing protocols

Recovery after 3 min door opening All probes recover to under 8°C within 5.5 min.

Energy consumption 0.71 KWh/day4 Average heat rejection 1.01 KWh/day (144 BTU/h)4 Noise pressure level (dBA) 34 or less installed

Pull down time to nominal operating temp 35 min

Controller, Configuration, Alarms and Monitoring

Controller technology Parametric, microprocessor, LED display with 0.1°C resolution

Temperature setpoint range 1°C to 10°C (Setpoint must remain unaltered from the factory setting to remain compliant with

NSF/ANSI 456 Standard for Vaccine Storage requirements)

Calibrated, stainless steel External alarm connection State switching remote alarm contacts Alarms Visual and audible indicators

High / Low temperature, compliant with alarm requirements defined in the NSF/ANSI 456 Standard

for Vaccine Storage

Simulator ballast Glass bead thermal media

Performance data acquired at 22°C ambient, using NSF/ANSI 456 compliant validation ballast probes, empty chamber, during stabilized steady state operation and a DAQ sampling rate of one measurement every 10 seconds

- 1 Uniformity is defined as the maximum variance in temperature across all probes at any point in time over the testing period
- 2 Stability is defined as the maximum variance in temperature experienced by any single probe over the testing period
- 3 Temperature performance for all loaded and unloaded door opening protocols, all alarm, controller and probe requirements as defined in the NSF/ANSI 456 standard for vaccine storage
- 4 Data per Energy Star test results or equivalent testing and calculation. Heat rejection based on daily averages, not continuous operation. Performance exceeds Energy Star requirements.

Product Data Sheet

Countertop 1 cu. ft. Glass Door Freestanding Vaccine Refrigerator - Certified to NSF/ANSI 456 Standard for Vaccine Storage

Certifications

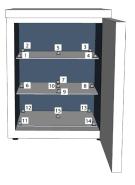

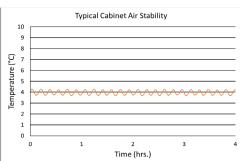

*-one or more of these certifications may apply to this unit.

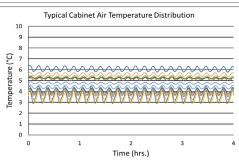

Temperature Probes						
Probe	Ave	Min	Max			
1	4.0	3.5	4.5			
2	4.0	3.7	4.3			
3	3.6	3.2	4.1			
4	3.4	2.9	3.8			
5	4.4	4.2	4.6			
6	5.3	5.2	5.5			
7	4.1	3.8	4.3			
8	5.1	5.0	5.3
