

# SaniiSwab™

Anytime Anywhere Nasal Care

**Healthy nose**  
**Healthy body**  
**SaniiSwab™**

## Nasal Cleansing Revolutionized

Patented design helps clear airborne contaminants from nasal skin

- ✓ 1-minute nasal cleanse
- ✓ 2-step, pre-saturated swabs
- ✓ Portable, discreet, disposable

## Clean your hands AND your nose

Because these airborne threats are everywhere:

### BACTERIA

- Staphylococcus aureus
- Staphylococcus methicillin resistant (MRSA)
- Staphylococcus epidermidis
- Staphylococcus pneumonia
- Enterococcus
- Clostridium difficile
- E. coli
- Haemophilus influenzae
- Klebsiella pneumoniae

### VIRUSES

- Influenza A and B
- RSV
- Parainfluenza
- Adenovirus
- Rhinovirus
- Enterovirus
- Herpes simplex
- Coronavirus
- Covid-19
- SARS

### ALLERGENS

- Pollen
- Smoke
- Pollution
- Chemicals
- Mold
- Mites
- Dander
- Dust
- Debris
- Pet Fur

# How SaniiSwab works

## 1-minute, 2-step, daily treatment

Patented columellar guard and anatomically designed swab length ensure correct placement in the lower nasal skin —**avoiding nasal mucosa.**

### Step 1: Clean

Open easy-tear packet.  
Place pre-saturated cleaning swabs (one for each nostril to avoid cross-contamination) against nasal skin and rotate 7 times. This removes secretions, mucous and debris to improve **SaniiClean** (Step 2) effectiveness.  
Discard cleaning swab. **Never re-use.**

### Step 2: SaniiClean

Open easy-tear packet.  
Repeat Step 1 action with pre-saturated cleansing swabs to help reduce germs, bacteria and allergens.  
Discard swab. **Never re-use.**

## Why SaniiSwab works Surgically Proven

“Your **nose** is a main entry point for infection—which is why **daily nasal cleansing** is as **important as washing your hands.**

My 2-step method—used in over 2,000 nasal procedures with **ZERO** infections—is now available for anytime, anywhere use... **SaniiSwab™**

John W. Polley, MD,  
Craniomaxillofacial Surgeon  
and developer of SaniiSwab™
