

April 1, 2026

Dear Valued Partner,

We want to keep you informed of current market conditions impacting our industry.

Ongoing global instability, particularly in the Middle East is placing significant pressure on supply chains. As a result, we are seeing rapid increases in raw materials and energy costs. HDPE and PP resin markets continue to rise, directly impacting pricing across many resin-based products. Additionally, rising fuel costs are affecting both inbound and outbound freight.

At BASCO, we continue to actively secure inventory and bring it into our facilities as quickly as possible to help minimize the impact wherever we can. However, due to the speed and unpredictability of these changes, pricing will be determined at the time of shipment.

Your BASCO representative will be reaching out to better understand your upcoming needs and to provide the most current pricing and availability. Our goal is to help you plan and navigate these changes with as little disruption as possible.

We truly value your partnership. For over 80 years, BASCO has supported customers through evolving market conditions, and we remain committed to being your reliable, responsive partner for your business.

If you have any immediate questions or upcoming requirements, please don't hesitate to reach out to your BASCO representative.

Sincerely,

**Tim Barry**
