** A complete list of impacted product references is provided in the Annex.*

Dear Valued Customer,

Ansell remains committed to delivering the highest standards of quality, performance, and supply continuity across our Cleanroom Apparel portfolio.

We are writing to inform you of an upcoming change to the base sheet material source used in Kimtech™ A5 Sterile Cleanroom Apparel supplied within North America.

Ansell will transition to a new supplier for the base sheet material used in the Kimtech™ A5 product range. This change is limited solely to the material source and does not impact:

- Product design
- Form, fit, or function
- Intended use
- Manufacturing process at the converter
- Product specifications or performance
- Quality controls or release criteria

Following Ansell's acquisition of the Kimberly-Clark PPE business, we have taken the opportunity to further streamline and strengthen our supply chain. This change supports our long-term strategy to ensure:

- Improved supply chain resilience
- Enhanced supply continuity
- Sustained delivery of high-quality products for controlled and cleanroom environments

The new base sheet material has been rigorously evaluated and:

- Meets or exceeds the performance characteristics of the current material
- Comply with all applicable quality and regulatory requirements
- Maintains all existing product certifications
- Ensures no impact on garment performance, cleanliness, or safety

Supporting validation documentation, including sterile validation reports, will be made available upon request to support your internal change control processes. The full validation package is expected to be available by **October 2026**.

Implementation Timeline & Logistics

The transition is planned as follows:

- Production start: Early 2027
- Regional availability:
 - North America: From April 2027

Products will continue to be distributed in accordance with standard **FIFO (First-In, First-Out)** practices. During the transition period, you may receive products manufactured with either the current or the new base sheet material. Full batch-level traceability will be maintained throughout.

Customer Action: No immediate action is required.

Customers are encouraged to review this prenotification in accordance with their internal change management and quality systems, and to request supporting documentation if needed.

Thank you for your continued trust in Ansell. We remain fully committed to transparency, compliance, and the highest standards of product quality. Should have any further questions about this communication, please contact your Ansell sales representative.

Yours Sincerely,

A handwritten signature in black ink, appearing to read "Jodi Schneider".
