PRODUCT INFO

CI-191CXA is designed to best support a variety of cell cultures with its precise control of temperature and CO2 concentration. Smart capabilities in the touchscreen and remote monitoring accessory simplify the process of setting, adjusting, and monitoring parameters. The precise internal control of the AIREA CO2 Incubator takes the user's set parameters and creates accurate and optimal conditions for cell growth. The temperature uniformity and absence of condensation provided by the heated door also help ensure consistent results throughout the incubator's chamber. Reliable CO2 and humidity sensors deliver accurate readings and take the guesswork out of managing the environment of cell cultures.
