

FOR IMMEDIATE RELEASE

CHANGE OF COLOR FOR RV400 SERIES GLOVES

TechNiGlove International would like to announce a change in the product color of the RV400 series, exam grade gloves.

To streamline production of our exam gloves, the RV400 series glove will temporarily be produced in our standard blue color instead of The New Blue color traditionally used. This change is only temporary as we streamline production to meet the urgent demand needs of our customers. All other specs, including mil thickness and accelerator free formulation, remain identical. During this time, you may receive product in both The New Blue and the standard blue colors below:

Our production, manufacturing and technical specifications have not changed. You will be receiving the same exceptional product and service, simply in a different color.

If you would like more information or have any questions, please contact our office at 1-877-NITRILE or email at customer-service@techniglove.com.

Thank you for supporting Techniglove!
