

Important Supply Chain and Pricing Update

Dear Valued Customer,

I am writing to inform you of upcoming price increases resulting from recent geopolitical disruptions that have impacted both nitrile and latex gloves, as well as non-woven cleanroom apparel. As a result of these events, we have seen significant increases in raw material costs, energy prices, freight expenses, and other supply chain-related costs across our product categories.

Effective July 1, 2026, CT International will implement the following price increases:

- **Gloves:** Ranging from 16% to 22%
- **Non-Woven Apparel:** Ranging from 6% to 10%

While these increases are necessary, they do not reflect the full extent of the cost increases CT International is currently experiencing. We have chosen to absorb a portion of these costs in an effort to minimize the impact on our customers while continuing to provide the quality, service, and supply reliability you expect from CT International.

While recent developments indicate that shipping through the Strait of Hormuz may continue to normalize, supply chain costs do not adjust immediately. Raw material, manufacturing, and transportation costs increased rapidly over the past several months and are now reflected in the inventory entering our supply chain. The products being received today were produced and purchased during a period of significantly higher costs.

Your CT International sales representative will be sending a separate communication outlining your specific pricing changes. Should you have any questions regarding pricing, product requirements, or future supply needs, please contact your sales representative directly or feel free to reach out to me personally.

Thank you for your continued trust and partnership.

Sincerely,

Matthew Wilbourn
Senior Vice President & General Manager
CT International
