Re: Price Adjustment Notification

Dear Customer,

In recent weeks, the Iran–Middle East conflict has driven sharp increases and volatility across key cost drivers that directly impact our business. Energy prices have risen significantly, affecting energy-intensive manufacturing such as glass, plastic, rubber, and aluminum production. Global freight and logistics networks have also been disrupted, resulting in higher transportation costs, longer transit times, and reduced reliability. In addition, key raw material inputs have seen upward cost pressure. Many of our partners and suppliers have already implemented corresponding price increases to DWK Life Sciences.

Despite our continued efforts to mitigate and absorb these cost pressures internally, the magnitude and immediacy of these increases can no longer be borne by DWK alone. As a result, we will implement a price adjustment effective May 15, 2026. This adjustment will only apply to new orders as of this date.

We understand that price changes require planning, and our team is committed to supporting you through this transition. We greatly appreciate your continued partnership.

Sincerely,
