

- Ready-to-use 2X, single tube master mix
- High accuracy; early detection with low ct values
- Superior sensitivity; Ideal for low copy number templates
- Proprietary intercalating green fluorescent dye for minimal PCR inhibition and optimal fluorescence
- qMax Probe: compatible with popular hydrolysis & beacon probes
- Available with Low or High ROX dye. Also available without ROX

qMaxT M Green w/ Blue Tracking Dye

Offer limited to new customers only
Limit of 5 units per new customer only

Catalog#	Description	Size	Price
CHM03W200-PROMO	qMax Green qPCR Mix, No Rox	100rxns	\$88.33
C838Q63-PROMO	qMax Green qPCR Mix, High Rox	100rxns	\$88.33
C838Q67-PROMO	qMax Green qPCR Mix, Low Rox	100rxns	\$88.33
C838Q80-PROMO	qMax Probe qPCR Mix, No Rox	100rxns	\$88.33
C838Q71-PROMO	qMax Probe qPCR Mix, High Rox	100rxns	\$88.33
C838Q76-PROMO	qMax Probe qPCR Mix, Low Rox	100rxns	\$88.33

Promo Part Numbers **INCLUDE** 100 reactions for **FREE**, for a total of 200!

qPCR Mix
(Purple)
targeting ACTG1
gene sequences.

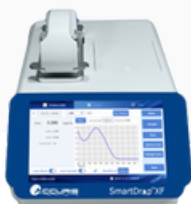

Also Available From Accuris

isoPURE™ Mini
Automated Purification System

- Process up to 16 samples with magnetic bead kits

SmartDrop™
Nano Spectrophotometer

- Quick and accurate results from a sample droplet

Smart-Q™
Quantitative Fluorometer

- Sensitive quantitation down to 0.1pg/ul ds DNA
