

May 7, 2026

IMPORTANT NOTICE!

Dear Valued Customer,

We are writing to inform you of an upcoming **temporary price increase** affecting our **disposable and chemical gloves**, effective from **June 1st, 2026**.

Due to the current externally driven and highly volatile market environment, several of our upstream suppliers are facing **force majeure conditions**, particularly impacting nitrile raw materials. As a result, this temporary price increase will apply for a minimum period of three months and will be reviewed regularly based on raw material availability and market conditions.

The strong volatility in Brent crude oil prices observed since early 2026, driven by geopolitical tensions and supply chain disruptions, has led to a **sharp rise in petrochemical feedstock costs**. As nitrile, neoprene and butyl rubbers are derived from petrochemical intermediates such as butadiene, these glove materials are directly impacted by oil price fluctuations, generating significant cost inflation.

Please find below, the overview of the impacted product ranges. The full price guide with updated information to follow next week.

Please note, to ensure continuity of supply and equitable distribution under current market constraints, deliveries may be managed based on historical sales volumes, where necessary. Starting June 1st, all deliveries will be impacted by the price increase.

Please reach out to your MAPA representative with any questions or to review your specific product impact.

Sincerely,

Patrick Evans
Sr. National Sales Manager
