

April 8<sup>th</sup>, 2026

**Dear Valued Customer,**

Thank you for your continued partnership and trust in Solstice High Purity Chemicals. We remain committed to delivering the quality, reliability, and performance you expect from Solstice.

Over the past few months, we have experienced continued increases in key inputs, manufacturing, energy, and logistics costs across our supply chain. These dynamics have had a direct impact on the cost of raw materials and energy essential to the products we provide, directly inflating production and logistics expenses.

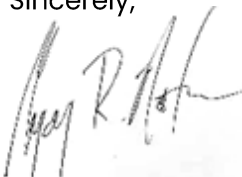

While we have taken steps to manage and absorb these increases where possible, the sustained nature of these cost pressures now requires a price adjustment.

- Effective May 15<sup>th</sup>, 2026, Solstice will implement the following price increases:
  - Prices on sodium tungstate will increase from 50% to 150% depending on the pack size due to the significant increases in tungsten
  - Prices on silver sulfate will increase by 15% due to the increases in silver
  - Prices for all other Solstice Research Chemicals products will receive a 5% increase
- All open orders shipping on or after May 15<sup>th</sup>, 2026, will be updated to reflect the new pricing

This adjustment is essential to ensure we can maintain the reliability, quality, and service standards you expect from Solstice. Details regarding impacted products and associated prices will be shared separately by your Solstice Account Manager.

We sincerely appreciate your partnership and continued trust in Solstice. Thank you for your understanding and support as we navigate these market dynamics together.

Sincerely,

A handwritten signature in black ink, appearing to read "Gregory R. Norton".
