# WORKFLOWSERVICES

by **IMAGE**MOVER

A turn-key software platform for point of care testing

Point of care testing at urgent care facilities is often laden with paperwork. Patients are required to fill out lengthy screening questionnaires. The information collected is often scanned into the electronic health record and these processes are time consuming. Point of Care Workflow Services by ImageMover digitizes these workflows to enhance the patient experience, reduce the burden on staff, automate reporting if needed, and increase revenue within your clinics. Meaningful point of care testing programs can be implemented and scaled efficiently.

Digitize patient forms, reducing staff burden

- Patients securely complete forms from their own devices
- Digital protocols are pushed across the organization
- Data is automatically reported to health authorities

Support care guidance and delivery

- Automatically communicate results securely to patients
- Provide patient guidance – referral, Rx, or other interventions
- Analytics dashboard to view community result data

Compatible with any point of care test

- COVID, Cholesterol, HgBA1C, Flu, Strep, STD, drug screening, etc
- Workflows for at-home testing or within the clinic
- Mobile app and web interfaces supported

"Workflow Services has enabled us to streamline our point-of-care testing protocols into sophisticated digital pathways. With Workflow Services, we've been able to quickly expand patient access to new clinical services."

Tom Giglio

Director

Clinical and Pharmacy Services

RITE AID

"Adding ImageMover to our K–12 student testing process was a game-changer. ImageMover is configured to address the specific requirements of our testing process."

Zac Morford

Chief Performance Officer, President of Life Sciences

FRIENDSHIP PUBLIC CHARTER SCHOOLS, WASHINGTON, D.C.
