

TECHNiGlove

INTERNATIONAL

April 1, 2026

Attached is the updated price list, effective June 1, 2026.

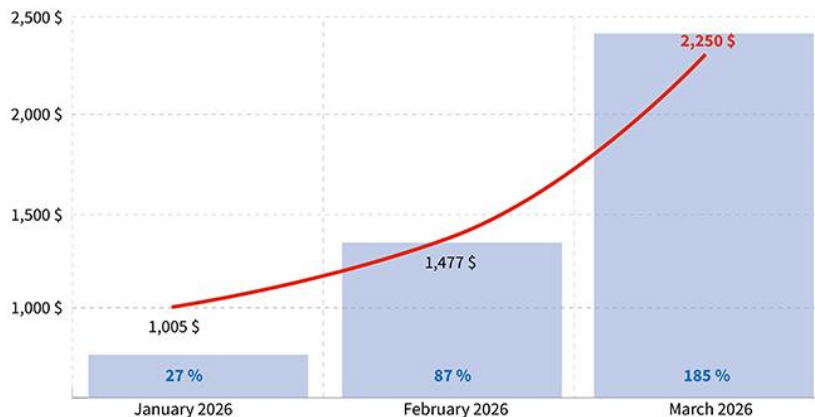

Please see below for key customer-facing details.

Due to ongoing geopolitical developments, the **current price increases are not the result of short-term market fluctuations.**

*Supply chains for key raw materials have been significantly disrupted

*Production capacity is constrained due to limited raw material availability

*The cost of butadiene (nitrile) has increased by 155%, and suppliers have declared Force Majeure

Price adjustments are being implemented on short notice to ensure continuity of supply.

For the June 1 price adjustment, we have partially offset the increase through reduction in tariffs following the recent Supreme Court ruling.

Please note, however, that the administration has indicated its intention to reintroduce tariffs at a higher rate in August. Should this occur, Techniglove will implement an additional price increase at that time.

In the interim, we will not be accommodating stock-up orders.

We understand the impact of these changes and appreciate your understanding as we navigate current market conditions.

Thank you for your continued partnership.

Best,

Darcy Thomas-Maskrey

Vice President, Operations
