

BCR® Cleanroom Face Masks

Face coverings designed to protect your cleanrooms and controlled environment – and your people too. Because the smallest measure can make the biggest difference.

Berkshire
ENGINEERED CLEAN

At Berkshire, when contamination poses a risk, we provide the products and services you need to minimize the risk of contamination in cleanrooms, controlled environments, and other critical manufacturing areas.

That's why we've designed our BCR® Face Masks to protect your cleanroom or controlled environment from human contamination – and ensure that your people are covered too.

Our masks undergo particle filtration and bacteria filtration efficiency testing and have superior filtration capabilities. They are free of surfactants, fiberglass, glue, binders, or thread. Available with dual sizing options, including an extra-wide mask to accommodate broader profiles and ensure additional coverage. Masks come with an adjustable nose piece, knitted ear loops, and a comfortable inside layer.

We are confident you will find a solution to meet your needs – all while providing long, lasting comfort to your people and helping you reduce the risk of product and process contamination.

BCR® Cleanroom Face Masks

Face coverings designed to protect your cleanrooms and controlled environment – and your people too. Because the smallest measure can make the biggest difference.

ENGINEERED CLEAN

3-Layer Design

100% Polypropylene Construction

- **Outer layer:** Blue polypropylene spunbound
- **Filter media:** Meltblown polypropylene
- **Inner layer:** White polypropylene spunbound

With a range of sizes, wear styles, and packaging configurations, you'll find the right combination of performance, fit, and comfort for your application.

Individually packaged mask option available for added assurance.
