

## Working Safely at the Bench

### Recommended list of equipment for individual use

Although the effects of the pandemic have lessened in many parts of the world, it's prudent to remain vigilant. Common-sense precautions, including individual benchtop equipment, can help you—and your labmates—work safely and productively. Here are some ideas that could help in protecting yourself, your colleagues, and your work.

▶ **Stagger lab hours**

Sign up for shifts to limit the number of people in the lab. Do laptop work (such as grant writing) from home.

▶ **Prioritize hand hygiene**

Wash hands with soap and water for at least 20 seconds before and after using gloves. Alternatively, utilize hand sanitizer stations and refill them often.

▶ **Have situational awareness**

Practice social distancing, and respect personal space. Keep at least 6 feet apart from colleagues.

▶ **Wear PPE while cleaning**

Use personal protective equipment (PPE) while cleaning. Wipe down reusable PPE (such as safety goggles) after cleaning.

▶ **Use individual benchtop equipment**

Consider buying additional equipment to limit using high touch items shared in your lab. Regularly clean and disinfect surfaces, equipment, refrigerator handles, and light switches with EPA-approved disinfectants.
