

# PolyMitt™ Cleaning Mitt Wipes

The Micronova **PolyMitt™** series offers the versatility of a high quality wipe with the convenience of a mitted hand. The Mitt Wipes come in a range of fabrics to meet a variety of cleaning applications. They are available gamma irradiated for aseptic areas, or non-sterile for more general cleaning. The mitt comes in one standard size, designed to fit comfortably over a gloved hand, making it easier to clean around carts, shelving, tanks, tubing, cleanroom chairs, and other hard to clean equipment and surfaces in the cleanroom.

Whether you are cleaning large surface areas, tight spaces, or awkward shaped surfaces, the versatility of the mitt allows for a more comfortable cleaning experience compared to standard wipes.

- Durable exterior cleaning mitt can be used with strong disinfectants
- Use wet or dry, mitt design allows for better surface coverage than a standard wipe
- Available with thin or thick foam interior, for added absorption and solution distribution
- Multiple fabric options to cover a wide range of cleaning needs
- For aseptic applications, mitt is available irradiated or can be autoclaved prior to use

#### Manufactured for use in Controlled Environments

- ISO 5 thru 9 Cleanrooms
- ISO 9001 Certified Manufacturing Facility
- Autoclavable (if applicable)
- Good chemical resistance to disinfectants
- Minimum Irradiation Dose: 25 kGy  
10<sup>-6</sup> Sterility Assurance Level
- In compliance with AAMI Guidelines for Sterilization (if applicable)

## SPECIFICATIONS
