Subject: Temporary Inner Packaging – Posi-Click Tubes

To Whom It May Concern,

Thomas Scientific has received delays in receiving standard inner packaging bags for our Posi-Click microcentrifuge tubes. To expedite receipt of inventories for our Posi-Click products, we have accepted temporary inner packaging, utilizing clear bags with printed labels.

This affects the following product codes:

- 1158R06
- 1158R07
- 1158R08
- 1158R18
- 1158R19
- 1158R20
- 1158R21
- 1159M35
- 20A00F915

This packaging change is only temporary, does not affect the form fit and function of these microcentrifuge tubes, and should be resolved within the next ninety (90) to one hundred twenty (120) days.

We appreciate your understanding, during this short-term period.

Sincerely,

John C Cincotta
SVP, Category Management & Corporate Marketing
