NEW MULTI-TX5 DIGITAL – VORTEX MIXER

WHAT'S NEW

We are happy to present the new **MULTI-TX5 Digital** designed for high sample throughput and superior versatility as it supports mixing applications requiring different test tubes.

Different **interchangeable foam racks** permit to work with different test tubes, from 10 to 29 mm in diameter.

The innovative and **compact design** ensures maximized operating comfort.

The instrument is equipped with advanced functions as auto-reverse of the stirring direction, intermittent mode programs, pulse mode and integrated timer to meet users' workflow. The safety lock feature avoids any possible alterations of the working conditions.

PRODUCT CODES

Code	Description	Note
F202A0460	MULTI-TX5 Digital Vortex	100-240 V / 50-60 Hz

ACCESSORIES

Various **foam racks** for different vortexing tubes make the MULTI-TX5 Digital an extremely versatile multi-tube vortex mixer to emulsify, disintegrate, mix, or homogenize samples. Typical applications include suspensions, genotyping, DNA and RNA Testing.
