April 20, 2026

Dear Valued Customers,

Global supply chain conditions continue to be significantly affected by the ongoing conflict in the Middle East. These disruptions have resulted in substantial increases in the cost of raw materials, resins, and associated transportation across the manufacturing sector.

Accordingly, KNF CRP will implement a 10% price adjustment on all new orders placed, effective May 1, 2026.

This adjustment is necessary to ensure the continued delivery of the high-quality, cost-effective products and services you expect from our organization. We will continue to monitor market conditions closely and will make further pricing modifications only when warranted.

Should you have any questions or wish to review pricing for specific materials, films, or product lines, or to inquire about discounts per higher volume orders. Please, contact your Accounts Manager, Patricia Floro

We appreciate your continued partnership and your understanding during this period of global volatility.

Sincerely,

Phil
